Zýsina-Molozhen,L.M. A study of the effect of a longitudinal pressure gradient on the development of a boundary layer, 0=12432
Zýsina-Molozhen,L.M. An approximate method for calculating the thermal boundary layer, 0=12512
Zýryanov,P.S. See Eleonskii,V.M., 0=3729
Zyuzin,N.I. See Zhuravlev,N.N., 0=10847

SCIENCE ABSTRACTS: SECTION B SUBJECT INDEX NUMBER

ELECTRICAL ENGINEERING ABSTRACTS

Published by The Institution of Electrical Engineers

SUBJECT INDEX 1960

Section B of Science Abstracts

SECTION A, PHYSICS: SECTION B, ELECTRICAL ENGINEERING

Electrical Engineering Abstracts volume 63 1960

Published by THE INSTITUTION OF ELECTRICAL ENGINEERS

Savoy Place, London, W.C.2; in association with the Physical Society,

the Institute of Physics, the American Physical Society

and the American Institute of Electrical Engineers

Committee of Management 1959–60

THE INSTITUTION OF ELECTRICAL ENGINEERS

THE PRESIDENT (*ex officio*)
L. G. BRAZIER, Ph.D., B.Sc., M.I.E.E.
J. A. BROUGHALL, B.Sc.(Eng.), M.I.E.E.
L. HARTSHORN, D.Sc., M.I.E.E.
R. L. SMITH-ROSE, C.B.E., D.Sc., Ph.D., M.I.E.E.

THE INSTITUTE OF PHYSICS AND THE PHYSICAL SOCIETY

J. H. AWBERY, M.A., B.Sc. (*Chairman*)
W. R. S. GARTON, D.Sc., A.R.C.S.
D. ROAF, M.A., D.Phil.
MISS A. C. STICKLAND, M.Sc., Ph.D.
L. R. G. TRELOAR, B.Sc., Ph.D., D.Sc., F.Inst.P.

THE ROYAL SOCIETY

W. C. PRICE, Sc.D., F.R.S.

THE CENTRAL ELECTRICITY GENERATING BOARD

H. W. GATEHOUSE, A.M.I.E.E.

OBSERVER FOR THE AMERICAN PHYSICAL SOCIETY

T. H. OSGOOD, Ph.D.

Editorial

EDITOR

B. M. CROWTHER, M.A., Ph.D., F.Inst.P.

SECTION EDITOR (Physics)

H. JENKINS, B.Sc., A.Inst.P.

SECTION EDITOR (Electrical Engineering)

L. MacQUISTEN WALLACE, B.Sc., A.M.I.E.E., A.M.I.E.(Aust.).

ASSISTANT EDITORS (Physics)

J. R. DAY, B.Sc.
MRS. J. M. L. BOLINGBROKE, B.Sc.
N. R. FOWLER, A.R.C.S., D.I.C., F.Inst.P.
A. M. LEVER, M.A.
T. B. WRIGHT, B.Sc., A.R.C.S.

ASSISTANT EDITOR (Electrical Engineering)

R. W. PRIOR.

ERRATA

Abstr. 4449 (1959) line 3: for "A.Wollener" read "A.Wollenek".
Abstr. 4570 (1959) line 11: for "transidyne" read "Transidyne" (this term is a Registered Trade Mark).
Abstr. 5054 (1959) line 10: for "normal generating" read "operating".
Abstr. 5647 (1959) line 3: for "(May-June, 1959)" read "(May-June, 1958)".
Abstr. 5652 (1959) line 3: for "Automat." read "Avtomat".
Abstr. 5797 (1959) line 5: for "13 times" read "$\sqrt{3}$ times".
Abstr. 5979 (1959) line 2: for "M.E.Pio" read "E.Pio".
Abstr. 6158 (1959) line 2: for "Kot'tsov" read "Kol'tsov".
Abstr. 6310 (1959) line 2: for "O.Bendikt" read "O.Benedikt".
Abstr. 6608 (1959) line 2: for "[Le BRUIT DE FORD]" read "[Le bruit de fond]".
Abstr. 6736 (1959) line 2: for "N.N.Fullilove" read "M.N.Fullilove".
Abstr. 6787 (1959) line 2: for "K.M.Siegal" read "K.M.Siegel".
Abstr. 6852 (1959) line 3: for "See also preceding abstract" read "See Abstr. 7668 of 1959".
Abstr. 6881 (1959) line 2: for "J.Zaborsky" read "J.Zaborszky".
Abstr. 7015 (1959) line 7: for "30 kΩ9 " read "30 kΩ".
Abstr. 7020 (1959) line 4: for "Pt 5" read "Pt 6".
Abstr. 7021 (1959) line 4: for "Pt 5" read "Pt 6".
Abstr. 7216 (1959) line 6: for "3.5 volts" read "3.8 volts".
line 8: for "Zr:UC" read "ZrC:UC".
Abstr. 7514 (1959) line 4: for "Pt 5" read "Pt 6".
Author Index (1959) p. 788, column 1: Kreuder,N.L.; add entry "Electronic design: reliability versus manufacturing cost, 7468".
p. 825, column 2: delete "Swarup,G. and Yang,K.S. Interferometer phasing at microwave frequencies, 7468".
p. 837, column 1: delete "Yang,K.S. See Swarup,G., 7468".
p. 836, column 1: for "Wollener,A." read "Wollenek,A.".
Subject Index (1959) p. 842, column 1: under Aerials, directive, delete line 31.
p. 867, column 2: under Electronic equipment, insert "economic considerations, 7468" between lines 72 and 73.

Abstr. 150 (1960) line 4: for "399-408" read "409-18".
Abstr. 269 (1960): for title as printed substitute "MONOTONIC MULTI-SECTION TAPERS FOR OVER-MODED CIRCULAR WAVEGUIDES".
Abstr. 678 (1960) line 7: after "extend" insert "their life and make".
Abstr. 1356 (1960) line 9: for "is" read "in".
Abstr. 1844 (1960) line 12: for "200 miles" read "2000 miles".
Abstr. 2375 (1960) line 3: for "Vol. 20" read "Vol. 90".
Abstr. 2691 (1960) line 3: for "N.Narbut" read "P.Narbut".
Abstr. 2714 (1960) line 3: insert "In French" at end of journal reference.
Abstr. 2840 (1960) line 3: for "(Feb., 1960)" read "(Dec., 1959)".
Abstr. 3004 (1960): for a full version of this paper see Abstr. 1785 (1960).
Abstr. 3108 (1960) line 3: for "H.Owyang" read "G.H.Owyang".
Abstr. 3202 (1960) line 2: for "G.H.Scholten" read "C.G.H.Scholten".
Abstr. 3287 (1960) line 3: for "M.S.Kohn" read "S.Kohn".
Abstr. 3297 (1960) line 4: for "Yu.Birzvalks" read "Yu.Birzvalk".
Abstr. 3301 (1960) line 4: for "M.B.Hochart" read "B.Hochart".
line 5: for "78-81" read "72-81".
Abstr. 3340 (1960) line 3: for "M.B.Fernier" read "B.Fernier".
Abstr. 3520 (1960) line 1: for "clasification" read "classification".
Abstr. 4069 (1960) line 2: for "M.J.C.Fowell" read "E.J.C.Fowell".
Abstr. 4220 (1960) line 3: for "H.Guilion" read "H.Guillon".
Abstr. 4453 (1960) line 15: for "Z.F.Zoyner" read "Z.F.Voyner".
Abstr. 4642 (1960) line 3: for "H.Fishher" read "H.Fischer".
Abstr. 4918 (1960) line 8: for "consumption is 24 hrs" read "consumption in 24 hrs".
line 10: for "5 kW/m^3" read "5 kWh/m^3".
Abstr. 5302 (1960) line 4: for "Trans" read "Proc".
Abstr. 5637 (1960) line 7: for "conductive" read "conducive".
Abstr. 5641 (1960) line 6: insert "insufficient to cause oscillation and the amount of delay" after "the degree of feed-back being".
Abstr. 5722 (1960) line 1: for "ELECTRIC" read "ELECTRONIC";
line 5: for "bands" read "boards".
Abstr. 5748 (1960) line 7: for "amplifier" read "amplifiers".
Abstr. 5909 (1960) line 1: for "DASK" read "DANSK".
Abstr. 6649 (1960) line 3: for "vables" read "cables".
Abstr. 6670 (1960) line 3: for "No. 2" read "No. 3".
Abstr. 6876 (1960) line 3: for "Vol. EM-7" read "Vol. ME-7".
Abstr. 7249 (1960) line 1: for "IF THE PROPERTIES" read "OF THE PROPERTIES".
line 7: for "intermediate frames" read "indeterminate frames".
January 1960, p. 3, column 2: between Abstr. 31 and 32, the cross-reference should read "Remote controlled operation of substations. See Abstr. 542".
July (1960) p. 417: for "4356 read "4256".

THE TRANSLITERATION OF RUSSIAN FOR BIBLIOGRAPHICAL PURPOSES

The use of l', n' and t' in Russian and Bulgarian (where they are not transliterations of a single letter, but merely l, n or t followed by the soft sign) is included to emphasize the fact that they are used for single letters only in Serbian.

Shch and sht invariably represent the letter Щ in Russian and Bulgarian respectively, since the pairs of letters (ШЧ in Russian and ШТ in Bulgarian) seem never to occur consecutively in the respective languages.

The above table is reproduced, by permission, from the pamphlet "The Transliteration of Russian, Serbian and Bulgarian for Bibliographical Purposes" published by The Royal Society, Burlington House, London, W.1 (February, 1953, price 1s. 0d.). It represents the system at present in use in "Science Abstracts" for the transliteration of the names of journals and the names of authors of articles abstracted.

A.E.I. Research Laboratory. Abstracts signed thus have been contributed by members of the staff of the Research Laboratory of Associated Electrical Industries, Ltd., Aldermaston, Berkshire.

The names of abstracting journals from which abstracts have been reprinted are given at the end of the "List of Journals".

Abstracts without signature have been prepared from the summary published with the article, except for a small number prepared by the editorial staff of "Science Abstracts".

LIST OF JOURNALS

The following list gives the full titles of journals referred to in "Science Abstracts", arranged in alphabetical order of the abbreviated titles used in the abstracts. Every endeavour has been made to ensure that the addresses given are those in use at the time of going to press, but as changes are continually being made no guarantee can be given of the accuracy of every entry.

The appearance of a title in this list does not necessarily imply that the journal is received regularly by "Science Abstracts". Material for abstracting comes from many sources, including borrowed copies of journals and reprints supplied by authors. Furthermore, some of the abstracts are reproduced, by permission, from other abstracting periodicals (as indicated at the foot of the abstract), and in these cases the name of the abstracting organization (from whom further information should be sought) is given in the list in place of the address of the journal, when the latter is not known. Particulars of the abstracting organizations are given at the end of this list.

It should be emphasized that an abstract is only published in "Science Abstracts" when an article or book is believed to be generally available. No abstracts are published of dissertations, reports or memoranda with limited circulation, unless copies have been deposited with several public libraries and are available from the publishers; nor of papers presented orally at meetings, unless precis of substantial length are published in the normal way. Thus the appearance of an abstract in "Science Abstracts" may generally be taken as an indication that the original is publicly available, and if it cannot be located in a library, application should be made to the publisher, at the address given in this list. In the case of books, the assistance of a bookseller should be sought. The original cannot be obtained from "Science Abstracts", though assistance will gladly be given in cases of special difficulty.

The contractions of journal titles used with the abstracts, while following the general form of those in the "World List of Scientific Periodicals" (3rd ed. London, Butterworths Scientific Publications, 1952), differ from them in some cases, to enable the title of the journal to be recognized more readily. General similarity will be found with the contractions used in "Chemical Abstracts", which have recently been adopted by the journals of the American Institute of Physics. To assist in the interpretation of contracted titles, adjectives are printed with a small initial letter, unless they form part of a proper name.

For the benefit of those who are unfamiliar with the form and purpose of such abstracting periodicals as "Science Abstracts", it may be said that each abstract is a summary of an article (or book) published elsewhere, the title of the article (or its English translation) being given at the beginning of the abstract. The "reference", printed immediately after the title and author, gives the name and date of the journal where the article was printed and the appropriate pages. In general, title, author and reference are usually required for the unambiguous identification of an article (e.g. in a bibliography), though the reference alone is sufficient for the location of the article. For books, the town of publication, the name of the publisher, and the year are given in the reference.

The form of the "reference", giving volume number, issue number, pages and date, will, it is hoped, be self-explanatory. It should be emphasized that the date given refers, in nearly every case, to the "issue" or "number" containing the article abstracted; in some cases, particularly when papers are issued separately, the "volume" when bound may bear a different date. The date given is that recorded on the issue, not the actual date of publication or receipt, unless so stated. When the volume carries no number, the year is given in its place.

If no indication of language is given in the abstract, the article may be assumed to be in English. This does not necessarily hold, however, for abstracts reproduced from other abstracting periodicals giving no indication of language.

Cirkular från Telestyrelsens Tekniska Byrå, Stockholm.

Colloq. Astrofis. (Suppl. Mem. Soc. Astron. Ital.)
Colloqui del Centro di Astrofisica del Consiglio Nazionale delle Ricerche (Supplementi alle Memorie della Società Astronomica Italiana). — Società Astronomica Italiana, Via Brera 28, Milan.

Com. Acad. R.P. Romine
Comunicarile Academiei Republicii Populare Romine. — Academiei R.P.R., Calea Victoriei 27, Bucarest.

Comment. phys.-math. (Helsinki)
Commentationes Physico-Mathematicae. — Societas Scientiarum Fennica, Helsinki.

Commun. Dublin Inst. Advanced Stud.
Communications of the Dublin Institute for Advanced Studies, Series A. — 64-65 Merrion Square, Dublin.

Commun. and Electronics
Communications and Electronics. — Part I of the Transactions of the American Institute of Electrical Engineers [Trans Amer. Inst. Elect. Engrs].

Conf. Internat. Grands Reseaux Elect. (CIGRE)
Conference Internationale des Grands Réseaux Electriques à Haute Tension. — 112 Boulevard Haussmann, Paris.

Contemporary Physics
Contemporary Physics. — Taylor and Francis, Red Lion Court, Fleet Street, London, E.C.4.

Conti Elektro Ber.
Conti Elektro Berichte. — Continental-Elektroindustrie-Aktiengesellschaft (CONTI-ELEKTRO), Düsseldorf.

Contrib. Inst. Roy. Meteorol. Belgique
Contributions. Institut Royal Météorologique de Belgique. — 3 Avenue Circulaire, Uccle-Brussels.

Control
Control. — Rowse Muir Publications, 77-79 Charlotte Street, London, W.1.

Control Engng
Control Engineering. — McGraw-Hill Publishing Company, 330 West 42nd Street, New York 36, N.Y.

Co-op. elect. Res.
Co-operative Electrical Research. — Electrical Research Association, Cleeve Road, Leatherhead, Surrey.

Curr. Sci.
Current Science. — Current Science Association, Bangalore 6.

Czech. J. Phys.
Czechoslovak Journal of Physics. — Czechoslovak Academy of Sciences. Circulation address: Jindřišská 14, Prague 3.

Dædalus
Dædalus (Proceedings of the American Academy of Arts and Sciences). — Wesleyan University Press, 356 Washington Street, Middletown, Connecticut.

Defence Sci. J.
Defence Science Journal. — Defence Research and Development Organisation, Ministry of Defence, Government of India, New Delhi.

Direct Curr.
Direct Current. — Garraway Ltd., 11 Kensington Church Street, London, W.8.

Disc. Faraday Soc.
Discussions of the Faraday Society. — 6 Gray's Inn Square, London, W.C.1. Publisher: Aberdeen University Press, 6 Upper Kirkgate, Aberdeen.

Dokl. Akad. Nauk SSSR
Doklady Akademii Nauk SSSR. — Lenin Prospekt, Moscow. [A translation of the "Physics Section" is published as "Soviet Physics — Doklady".]

Doshisha Engng Rev.
Doshisha Engineering Review. — Title changed to: Science and Engineering Review of Doshisha University [Sci. Engng Rev. Doshisha Univ.].

Dtsch. Elektrotech.
Deutsche Elektrotechnik. — Title changed to: Elektrie.

Dyna
Dyna. — La Asociacion Nacional de Ingenieros Industriales de España, Navarra 1-1°, Bilbao.

E.B.U. Rev.
E.B.U. Review, Part A (Technical). — Technical Centre of the European Broadcasting Union, 32, Avenue Albert Lancaster, Brussels 18.

E.R.A. (Stockholm)
E.R.A. Föreningen för Elektricitetens Rationella Anvåndning. — Drottninggatan 90B, Stockholm 3.

E.T.J. Japan
Electrotechnical Journal of Japan. — Institute of Electrical Engineers of Japan (Denki-Gakkai), Yuraku-cho, Chiyoda-ku, Tokyo. [The overseas English-language edition (selected and abridged) of the Journal of the Institute of Electrical Engineers of Japan, published monthly in Japanese].

Elect. Commun.
Electrical Communication. — International Telephone and Telegraph Corporation, 67 Broad Street, New York 4, N.Y.

Elect. Energy
Electrical Energy. — Morgan Brothers, 28 Essex Street, Strand, London, W.C.2.

Elect. Engng
Electrical Engineering. — American Institute of Electrical Engineers, 33 West 39th Street, New York 18, N.Y.

Elect. Engr (Melbourne)
Electrical Engineer. — Tait Publishing Co. Pty, 349 Collins Street, Melbourne; and 4a Bloomsbury Square, London, W.C.1.

Elect. J.
Electrical Journal. — Bouverie House, 154 Fleet Street, London, E.C.4.

Elect. Manufng
Electrical Manufacturing. — C–M Technical Publications Corporation, 205 East 42nd Street, New York 17, N.Y.

Elect. Rev.
Electrical Review. — Dorset House, Stamford Street, London, S.E.1.

Elect. Supervisor
Electrical Supervisor. — Association of Supervising Electrical Engineers, 23 Bloomsbury Square, W.C.1.

Elect. Times
Electrical Times. — Sardinia House, Sardinia Street, London, W.C.2.

Elect. Traction Rlys (Internat. Rly Congr. Assoc.)
Electric Traction on the Railways. Bulletin of the International Railway Congress Association. (English Edition). — 19 rue du Beau-Site, Brussels.

Elect. Wld
Electrical World. — McGraw-Hill Publishing Co., 330 West 42nd St., New York 36, N.Y.

Electricien
L'Electricien. — 92 Rue Bonaparte, Paris 6.

Electrochimica Acta
Electrochimica Acta. — Pergamon Press, 4 and 5 Fitzroy Square, London, W.1.

Electronic Applic.
Electronic Applications. — N.V. Philips' Gloeilampenfabrieken, Eindhoven. Subscription address: Cleaver-Hume Press, 31 Wrights Lane, Kensington, London, W.8.

Electronic Applic. Bull.
Electronic Application Bulletin. — Title changed to: Electronic Applications [Electronic Applic.].

Electronic Engng
Electronic Engineering. — Morgan Brothers, 28 Essex Street, Strand, London, W.C.2.

Electronic Industr.
Electronic Industries. — Chestnut and 56th Streets, Philadelphia 39, Pennsylvania.

Electronic Radio Engr
Electronic and Radio Engineer. — Title changed to: Electronic Technology [Electronic Technol.].

Electronic Technol.
Electronic Technology. — Iliffe and Sons, Dorset House, Stamford Street, London, S.E.1.

Electronica
Electronica. — Roemer Visscherstraat 2-4-6, Amsterdam.

Electronics
Electronics. — McGraw-Hill Publishing Co., 330 West 42nd Street, New York 36, N.Y.

Electrotechniek
Electrotechniek. — Moorman's Periodieke Pers, The Hague.

Electrotehnica
Electrotehnica. — Editorial address: Str. Ion Ghica 3, Bucarest. Administration address: Calea Victoriei 118, Bucarest.

Elekt. Bahnen
Elektrische Bahnen. — R.Oldenbourg, Rosenheimer Strasse 145, Munich 8.

Elekt. Stantsii
Elektricheskie Stantsii. — Publisher: Gosénergoizdat, Shlyuzovaya naberezhnaya 10, Moscow.

Elektrichestvo
Elektrichestvo. — 2, B.Cherkasskii per., Moscow K-12.

Elektrie
Elektrie. — V.E.B. Verlag Technik, Oranienburger Str. 13/14, Berlin C 2.

Elektrizitätsverwertung
Elektrizitätsverwertung (L'Electrique — Electrical Service). — Elektrowirtschaft, Victoriahaus, Bahnhofplatz 9, Zürich 23.

Elektrizitätswirtschaft
Elektrizitätswirtschaft. — V.D.E.W., Bockenheimer Landstrasse 109, Frankfurt am Main.

Elektrofertigung
Elektrofertigung. — A supplement to Elektrie, published as part of that journal, but with separate pagination.

Elektron. Rdsch.
Elektronische Rundschau. — Eichborndamm 141-167, Berlin-Borsigwalde.

Elektron. Rechenanlagen
Electronische Rechenanlagen. — R.Oldenbourg, Munich and Vienna.

Elektronik
Elektronik. — Franzis-Verlag, Karlstrasse 35, Munich 37.

Elektrotech. u. Maschinenbau (E.u.M.)
Elektrotechnik und Maschinenbau. — Elektrotechnischer Verein Österreichs, Eschenbachgasse 9, Vienna I. Publisher: Springer-Verlag, Mölkerbastei 5, Vienna I.

Elektrotech. Obzor
Elektrotechnicky Obzor. — Krakovská u.č 8, Prague 2.

Elektrotech. Z. (E.T.Z.)
Elektrotechnische Zeitschrift. Ausgabe A: Zentralblatt für Elektrotechnik. Ausgabe B: Der Elektrotechniker. — Verband Deutscher Elektrotechniker. Publication address: V.D.E.-Verlag, Bismarckstrasse 33, Berlin-Charlottenburg 2.

Elektrotechnika
Elektrotechnika. — Bajcsy-Zsilinszky-út, 22, Budapest 5.

Elektroteh. Vestnik
Elektrotehniski Vestnik. — Fakulteta za elektrotehniko, Aškerceva 9, Ljubljana.

Elektrotek. T.
Elektroteknisk Tidsskrift. — Norske Elektroteknisk Forening og Norske Elektrisitetsverkers Forening. Published by Norske Elektrisitetsverkers Forening, Blindern, Oslo.

Elektroteknikeren
Elektroteknikeren. — Landskronagade 70, Copenhagen Ø.

Elektrowärme
Elektrowärme. — Issued as inset in: Österreichische Zeitschrift für Elektrizitätswirtschaft [Österr. Z. ElektWirtsch. (Ö.Z.E.)].

Elettrotecnica
Elettrotecnica. — Associazione Elettrotecnica Italiana, Via S. Paolo 10, Milan.

SUBJECT INDEX

INTRODUCTION.

The entries in this index refer to the abstracts by their serial number, not by the page number. The entries are grouped under headings (underlined, e.g. "Aerials") which represent, in the main, general categories or concepts rather than specific names. No attempt has been made to provide an individual heading for every subject, machine, apparatus or component appearing in the literature of Electrical Engineering. If a heading for a particular subject does not appear, a more general heading should be consulted; for example, "Leclanché cells" would be listed under "Batteries, primary". There are numerous cross-references directing attention to related headings in other parts of the index.

Many of the headings are subdivided by the use of subheadings, which are indented (i.e. printed slightly to the right) and commence with a small letter (for example, see the subheadings under "Characteristics measurement").

ARRANGEMENT OF HEADINGS AND SUBHEADINGS.

The headings are arranged throughout the index in alphabetical order according to British Standard 1749:1951 (the "word by word" system, not "reading right through"). The subheadings are themselves arranged in alphabetical order under their respective headings.

INDENTED GROUPS OF ENTRIES.

In addition to the above, minor groupings of entries have been made by indentation under an introductory entry. The first phrase of the introductory entry (i.e. the phrase preceding the comma) is common to each of the indented entries. It is emphasized, however, that these groupings do not necessarily collect all the information on their particular subject; they are only convenient groupings of words, and further references may be given elsewhere in the same column under a different phrase.

COLLECTED LIST OF SUBJECT HEADINGS.

The alphabetical arrangement of the headings is the most convenient for locating a known heading quickly, but there may be other related headings elsewhere in the index of which the reader is unaware, and which he would only come across by accident. To assist the reader to discover all the headings appropriate to his subject, a collected list of the headings is given at the end of the index, which should be consulted as a matter of routine each time a search is made. In this list, the headings are not arranged in alphabetical order, but are grouped into sections by subject on the same basis as the arrangement of the abstracts in the monthly issues of Electrical Engineering Abstracts. By using this list, the reader can quickly determine which are the headings appropriate to his subject, and they are then easily found in the main index in their alphabetical position.

HEADINGS WITH NO ENTRIES.

Because Electrical Engineering is a developing subject, it is not possible to maintain the list of headings unchanged from year to year; it is subject to a continuous process of revision, with the introduction of new headings and subheadings, and the alteration and elimination of old ones. This process is a gradual one, however, and the great majority of the headings are the same as those of the previous year. To assist in maintaining the continuity of the index, all the headings in current use are printed each year, even those for which there are no abstracts to be recorded in the present volume. The latter are followed by the announcement "No entries this year"; this supplies confirmation that these headings have not been dropped from the index, and entries may reappear under them next year.

BEFORE USING INDEX, CONSULT LIST OF SUBJECT HEADINGS PRINTED AT THE END

radar data, air traffic control 3142-3, 6441-2
aircraft track simulator 1113
digital correlator 839
sequence access to tracking information 555
RAMAC, use in research literature searching 593
recording, checking, printing of logic diagrams 3859
reservoir discharge in combined hydro and thermal plants 6545
rotating machines, design programmes 1091
in shipbuilding 3205
simulation of a.m. data system performance 5285
simulation of data-switching system 4402
simulation of perceptual systems 8472
solution of army tactical problems 594 [5349
stability of synchron. generators, differential equations
study and prediction of vehicular traffic 584
survey of developments and applic. 3886
synthesis of complex systems 1090 [1089
synthesis of computer circuits using N.C.R. data processor
tank farm inventory control 7052

Calculating apparatus - contd
applications - contd
telephone traffic recording 6340
testing missile equipment 8479
thermal environment of power cables 7286
time domain theory, practical applic. 600 [7266
transmission-loss formulae, eigenvalues and modal matrices
transformers, design 588, 2021, 3308, 5909, 8467
loading determination 1261
surge stresses in windings 2015
trunk groups for overflow traffic 6889
two-channel data link, analogue–digital simulation 7033
Univac, airline reservations systems 3863
uses for optimal planning 1943
Calculating apparatus, analogue (See also Network analysers).
active bioelectric membranes, electronic control 3229
aerial radiation-pattern determination 8231, 8506-7
amplifiers, transistorized 6228
analogue division circuit 2601
analogue interpolator 7032
analysis of sums of distribution functions 3223
automatic display of noise suppression factor 4582
automatic optimization of function of several variables 3216
automatic "optimizer", two-channel 3868
auxiliary equipment, designs 5919
c.r.t. display of satellite orbit 5847
celestial navigation trainer 1111
character displays 1099
conformal mapping of n-order polynomials 3217
co-ordinate transformer, rectangular to polar 598
control-system simulator 4579
convertors for communication between computers 565-6
d.c. amplifiers, drift reduction 7036
auto. monitoring and zero setting 3907
transistorized 3610
d.c. integrators, error analysis 8501
data reduction for testing engine 3839
dead-time simulation devices 5289
delay line, servo-controlled magnetic-tape 7816
design and appln. problems 3206
for design of ladder filters 3509
determination of mag. fields with local permeability variations 4079
differential equations of bridge-rectifier operation 7037
differentiating and integrating circuits, positive feedback [7040
use of dig. computing elements to replay analogue elements [569
discontinuous and arbitary functions, production 1103
dynamic stability of paralleled synchron. generators 5921
electrical analogues for mech. problems 2606 [7039
electromechanical, Integral 1, for integration of diff. equ.
integrator for e.p.r. spectra 1950
for trignometrical problems 7042
electrostatic invertor using switched capacitor 560
errors due to nonlinearities 8502
errors in operational amplifiers, compensation 335,
for filter network design 2243 [7053
flight simulator, c.r.t. "contact analogue" display system
frequency-to-period-to-analogue computer for flowrate meas. [7049
function generators, for two variables 7045
padded potentiometers, calibration 3221
with operational amplifiers 1947
output boost with transistors 4580
potentiometer, error correction 7044
nonlinear, using diodes design 3222
diode, approximation errors 2602
with two inputs, design 8503
using rotating cylinder 5287
generalized integration 1102
generation of Fourier transforms and coefficients 7043
for heat flow in transistors 1651
high-resis. padded resistors, calibration 2798
high-speed, for high-order algebraic equations 8521
Ilmenau E.A.R.I. 5918
industrial control systems, economic and practical considerations 8374 [2605
integrating and differentiating circuit, periodic functions
linear differential equations, programming 3207
LILAVATI, passive network type 4577
logarithmic transistor amplifiers, design 4233
mean square value of random signal, meas. 7431

Calculating apparatus, analogue - contd
MERIAC-1-F, for waveform analysis 3212
missile-homing investigations 8510
model for inductance of a.c. magnets 2192
model for speech recognition and synthesis 947
multiplying and function generation, position and velocity servos 2565
for multiplication of exponential functions 7038
multiplication using time as one variable 8500
multiplier, using grounded-base junction transistor 887
four-quadrant 1110, 1949
with transistor modulators 3455
precision 5916
Hall-effect 870
network analyser, exact representation of impedances 8523
nonlinear filter, predictor and simulator in self-teaching computer 5282
Nuclear Electronics Symposium, Paris (1958) 4975-6
OSAC, optical solid-angle computer 8515
oscillographic recorder, new concept 1946
for parametric amplification demonstration 3630
particle trajectory tracing 8505
Perceptron, visual-system simulation 8524
perturbation technique 1109 [7048
photoelectric reader of recorded ink lines on strip charts
pneumatic type 3211
product of impulse count and variable quantity 5915
reciprocal circuits, design 7034
with resistance-network analogues 4584 [3909
resistance network analogues, for partial diff. equations
resistance network, design 3908
resistance type, for linear simultan. equations 2603
respiratory control of heat rate, simulation 5725 [4575
ripple-type time-delay networks, use of elliptic functions
"rotar" integrator circuit 1952
sampled-data systems, compensation 8512
for servo. system analysis 8514
servo type, solution of nonlinear problems 8511
Sielomat, applic. to load-frequency regulation 7101
simulation, of nuclear reactors 3215
of mag. fields in machines 5336
systems of coupled bimolecular reactions 3228
for nuclear power-station operations 5922
airborne radar display 1019
solution of algebraic equations 8520
solution of difference equations 1101
solution of linear differential equations with variable coefficients 8522
solution of London's superconductivity equations 8509
for solution of product integrals 2604
space-charge fields determination 7985
squares, generation with nonlinear resistors 7041
for study of transients in elec. supply systems 5290
synchronous machine simulation 3910
synthesis of linear algebraic matrix equations 5291
tape reader and digital–analogue convertor 5920
techniques for engineering problems 4576
telemetering data, automatic processing 4587
torsion problems, solution 7050
for training letter-sorting machine operators 1956
transfer-function computer for random signals 4581
transfer-function manipulation for economic simulation 8517
transfer function of automatic control systems, determination 8403
transformer type, direct metering 4583
transistorized U.S.S.R. design, type MN 10 3210
of travelling-wave tube 1698
U.T.A.C. 7035 [2607
vibration of a beam and rectangular multicellular structure
differential analysers
analogue difference analyser using delay line 3227
DIANA, electromechanical type, design 3226
digital differential analyser, transistor circuits 3583
digital, systematic scaling system 7031
noise, stability and component tolerances, soln. of partial diff. equations 7030
repetitive, for roots of polynomials 1100
simulation of orthonormal approx. functions, linear system approximation 1104
solution of differential equations 8519
applications
aircraft high-temp. a.c. generating systems 3884

Calculating apparatus, analogue - contd
applications - contd
analogue devices in industry 4585
control mechanisms in blood circulation, analysis 3230
control of power, arc furnaces 2879
design and analysis of luminaires 6687
design of aircraft anticipatory displays 4578
directivity characteristics of complex aerial arrays 7047
economic load distribution, calc. 1262
economic operation of interconnected supply network 597
electron-trajectory tracer 3447 [7046
function approximation to minimize mean. quadratic error
h.f. resonant responses of disk cutter applications 434
use in heart ailment diagnosis 1115
hydrometallurgical processes, density regulation 8516
induction-motor design 596 [7404
Laplacian fields, inversion principle in electrolytic tank
load applied to insect muscle, simulation 1116
magnetic amplifier design 7843
motor with 3 ph. slip-ring rotor, simulation 595
multi-generator systems 3213
networks represented by linear transfer functions 1105
optimization by random search 1106
optimum setting of water-turbine governors 6628
process control in chemical industry 599
regulation charac. of wind-tunnel drive applications 1951
servomechanisms, study and adjustment 8421
simulation of air conditioning systems 2608 [5924
simulation of electric drive for power-station blowers
simulation of inductance by an integrating circuit 2857
simulation of nonlinear effects 3224
simulation of nuclear reactor systems 3214
simulation of respiratory control of heart rate 1114
simulation of transfer functions 5288
strip thickness variations, rolling mills 3231
study of traffic at controlled cross-roads 7051
train-performance plotter 1953
transistor current-gain 2177
two-dimensional oscillations in particle accelerators 8504
use as transfer function analyser 1948
transfer functions of systems, matching with simulator network 8518
transmission line with various boundary conditions 1954
vibration amplitude responses of distrib. system with structural damping 1108
Cameras (See Television cameras).

high-capacity systems and methods survey 3723

Carrier telephony - contd
insertion-loss meas., self-tuning equipment 6675
K24A syncoplex system for local lines 4408
line amplifier, universal, balanced carrier cables 5160
long-distance, equipment improvements 5748
open-wire lines, design 5751
power feeding on symmetrical-pair cables 5752
pulse-phase mod. system, 60-channel 8145 [358, 4260
rectifier modulators, with freq.-selective terminations input impedance 361, 4264
repeater equipment, transistorized 5746
s.s.b., generation by polyphase modulation 935
60-channel cable system, E. Germany 5161
stable-freq., supplies, transistorized 820 [6342
symn etrical cable circuits, equalization and supervision with single-phase power supply, losses 5753
system design using transistorized repeater 936
temp.-attenuation coeff., paper-insulated quad cables 1777
terminal equipment, built-in out-band signalling 1756
three-circuit equipment, transistorized 8144
12 channel open-wire systems, transistor amplifiers 5024
transistor amplifier, intermodulation distortion 1599
transistor feedback amplifier 856
transistorized systems, for Australian conditions 6341
terminal equipment, 4 kc/s carrier spacing 5745
for improved reliability 5748
20-channel terminal 928
transposition system, type B1, upto 156 kc/s 2459
trunk system, type 565, transistorized 8147
wideband phase-shifter 5747

Carrier transmission, power lines
coupling losses, calculation 1757
d.s.b. s.c. multiplex system for cable applic. 973
deliberate faults to test carrier protection systems 131
effect of load-switching transients 7264
filter design for protective devices 4760
h.f. line traps, wideband tuning 5158
injection through capacitive voltage transformers 3991
on interconnected 6 kV o.h. line networks 5744
max. tolerable level of interference 8142
meas. instruments for wideband coaxial circuits 3446
oscillators for 3.8 to 4.2 kMc/s band 1527
remote operation of switchgear 4569
selective protection systems, h.v. lines 7007

Castings (See also Foundry practice).
No entries this year

Cathode followers
anode-cathode follower pulse inverter 3550
bootstrap integrator circuit 7743
electrometer tube, for large input voltages 7835
high-stability, using double triodes 3595 [6792
impedance transformation using secondary-emission pentode
ultralinear circuit 6793
White circuit, transient analysis 3596

Cathode-ray tubes (See also Electron beams; Electron guns; Fluorescent screens; Image-storage tubes; Oscillographs; cathode-ray; Television camera tubes; Television picture tubes).
astigmatism, measurement 5706
cathode temp. meas. methods 2139
character generator for digital computer 3871 [3048
commercial types, comparison with transient storage type
computer display, light sensing probe 1944
data storage and recording 5705
deflection nonlinearities meas. 7480
deflection plates, electrostatic, design 6851
deflection-yoke circuits 2426
display devices, panel type, review 6830 [8010
double magic-eye tube for stereo-recording level indication
E 1 T type, fast counting applications 2283
e.m. deflection, transistorized linear time-base 1541
flying-spot store for electronic switching 3047
getters, use of titanium 2427
as high-intensity flash light sources 7580
high transconductance wide-band electron gun 3692
image-intensifiers for radiology 8011
image transformation by deflecting fields, theory 4350
infrared colour translation 7940
infrared data display 8012
infrared detector 7942
as light-pulse generator for photomultiplier testing 3038
orbit display of earth satellites 5847

Cathode-ray tubes - contd
oscillograph types, survey 396
photomicrometer for line light-intensity profile meas. 7528
production of extraneous X-rays 6293
reflected-beam, radar and television applic. 8328
screens, adhesion and settling-liquid composition 5707
secondary emission, electron velocity and space charge 4352
transfer function, effect on detection threshold 8317
transistorized power supplies 3541
triode gun with beam-former electrode 3049
use as frequency-multiplier for variable freq. 1576

Cathodes
thermionic
arc cathode, energy distribution and electron-emission cooling effect 3672
carburized thoriated W, thorium evap. 3671
chemical reactions, expts. 4316
for cold-cath. gas discharge tubes 1457
cold, field-emission type, stable, high-density 3669
emission in l.p. discharges 2433
field-emission electron source 4312 [3057
Geiger-Muller tubes, work function and operating charac.
heated field-emission, stability and life 3670
heating time meas. 7443
high current-density types 7964
impedance rel. to freq. stability of oscillators 2926
impregnated, in thermionic converter, theory 4323
ion and plasma propulsion, comparison 5303
interface impedance measurement 2117, 5490
MgO cold-cathode, vacuum tube applic. 2418
nickel matrix, carbon-activated, processing 3673
nuclear radiation effects 388
planar, low wattage type 6290 [4000
surface roughness and oxidation, effect on arc movement
meas. by retarding field technique 4309
UC, emission measurements 5085
use of negative glow plasma 6294
thermionic, oxide-coated
activation, emission of oxygen negative ions 6288
activators, migration of Si and Mg 7965
barium-calcium aluminate impregnated W, poisoning 4311
Ba, WO_4 emission measurements 5086
charge localization on surfaces expts. 4315 [5693
conductivity, current-dependent matrix dissociation 894,
in c.r.t., temperature meas. 2139
coating method using ultracentrifuge 7969
diffusion of Ba in SrO layer 6289
fused alumina coatings, leakage currents 1689
gas evolution and ion emission from anodes of Ag, Cu, Ni, Mo, Ta, Ti and W 3675
in H, work function and sparking potential 2416-7
heater-cathode breakdown, oxidation of tungsten film 7967
interface impedance meas., nonlinearites 6291
L-type, for high powers, manufacture 4310
life expectancy and vacuum processes 7978
nickel, oxide proportion of Si and Mg activators 7966
parallel plane emitters, potential diff. and current 6839
prop. of solid semiconductors below 600° K 3674
receiving valves, anode luminescence 6295
sandwich type, characteristics 3041
temperature variations produced by current flow 7968
thermo-electric properties 5690

Cavity resonators (See Resonators, cavity).

Cells (See Batteries).

Ceramics (See also Insulating materials).
brown colouration of h.v. insulator glazes 3328
in construction of microwave tubes 4314
deposition by spraying 3917
envelope material for transmitting tubes 3677
flame-sprayed, as electromech. transducer 153
high dielectric constant, characteristics 4056
insulating, effects of nuclear radiation 1325 [7970
low-loss, characteristics for thermionic-tube construction
mica–glass insulants, for high-temp. use 149
printed-circuit devices 5121
sealing to titanium 7977
semiconducting, ohmic contacts 5045

Characteristics measurement
arc furnaces, power factor and efficiency 6132
combined methods 771
automatic, of dielectrics 7420

Characteristics measurement - contd
ceramics, dielec. props. at Q-band 5495
dielectric losses, effect of electrode impedance 2804
diode switching, test equipment 3430
electromag. charac. of solids and liquid up to 7 Gc/s 4824
electromech. transducers 2816
galvanic cells, characteristic curves and analysis 3483
group-delay meas. at 3.6 to 4.2 Gc/s 1416
high-resolution Fabry-Perot interferometer 4093
microphones, calibration and rating 6347 [7480
oscilloscope cathode-ray tubes, deflection nonlinearities
photomultipliers, speed of response 5687
semiconductors, microwave absorption 4823
bulk lifetime meas., microwave method 2152
carrier lifetime, phase-shift method 3433
carrier lifetime, Many bridge 2838
lifetime of photo-injected carriers 183
p-n junctions, at low temperatures 3011-12
diodes, switching charac. meas. 1389
Si diodes, conversion loss 2839 [1629
silicon, lifetime meas., photocurrent modulation method
diffusion constant and length of excess carriers 1391
rectifiers 2030
thermoelectric props. 743
soft ferrites at microwave freq. 4113
of television picture-tubes 8339 [7516
for thermionic-tube charac. plotting, with c.r.t. display
thermistors, time-constant 7386
transistors 3431, 5068-9, 7485
appln. of surface-meas. techniques 2154
beta, automatic method 2151
charact. freq. measurements, 20-1000 Mc/s 4086
current-gain, 1-300 Mc/s 1388
curve tracer 1394
decay time of excess base minority carriers 6277
emitter carrier-storage 2391
equiv. circuit parameter at v.h.f. 1393
meas. of h-parameters 381
r.f. methods 2153
small-signal parameters 1392
specification meas. and practical standards 5073
storage-time 4293
switching, parameter meas. set 3432
tester 181
thermal impedance 3019
transient switching parameters 182
at v.h.f. 2156
tunnel diodes, curve tracing 7484
exptl. display 6817
test set 2837
waveguides, resonator method 164, 7425
Charge measurement (See also Electrometers).
electrification of insulating sheets 155
on surface of solid dielectrics after h.v. discharge 2104
Charts (See Diagrams).
Chemical technology
coupled bimolecular reactions, analogue-computer simulation 3228
electric motors for drives, characteristics 7154
process control, computer applications 8470
smelting, electric furnaces 6703
Circle diagrams (See also Transmission lines, h.f.).
for inverters 4684
salient-pole synchronous motor 1201
for synchronous machines 1196
synchronous reactance motors 6586
Circuit-breakers (See also Circuit-breaking arcs).
developments up to 35 kV, 2000 MVA 6011
for d.c. traction motors, 1kA at 1.5 kV, design 7311
earth-leakage, h.r.c. type 5423
for protection of l.v. apparatus 2765
for h.v. protection 2780
installation and testing 114
endurance tests on synthetic resin cases at 48 kV 1341
epoxide resins, use of 1271-2, 1340
field-suppression of turbo-alternators 46, 3970
and h.r.c. fuses, discrimination 113, 2735
h.v. and m.v., progress review 3340
h.v.d.c., use of rotating plasma 7306
interrupting-capacity tests 4731
laboratory 1845
long-burning arc types, synthetic circuit 7309
Circuit-breakers - contd
methods and equipment 6059
selection of test voltage 4022
synchronization circuit 3344
synthetic methods for high power types 7310
oil-break and air-break compared 112
pull-out, with new method of phase separation 4732
reclosing, use in distrib. networks 7352
recovery voltage and circuit parameters 683
switching behaviour with unloaded transformers 3345
using SF_6 as filling gas, 15000 MVA design 1275 [1273
specification with reference to assymetrical rupturing cap.
for thermonuclear research 2044
380-kV system, France, auto. reclosing experience 4695
3500 MVA at Ferrybridge 'B' 7122
types and application, survey 2046
air-blast
air-break switches, 138 and 345 kV operating tests 5426
condensation in tropical climates 5425
current zero period, research review 4023
h.s. magnetic type, for 4 kV distrib. networks 2048
h.v., restriking volts on short-circuit near station 2734
highly inductive d.c.h.v. lines, U.S.S.R., research 682
outdoor, types for 115 to 460 kV 685
overvoltages with two-or three-phase earth faults 5424
oil
low oil-content, dynamic behavious of arc 4024
operating experience, review, 15-138 kV types 5428
single-tank outdoor 3 ph., up to 46 kV 2736
testing code, work by A.S.T.A. 2047
tests on 69 and 115-230 kV units 5427
230 kV, 2×10^4 MVA 686
25000 MVA, tests 1274
Circuit-breaking arcs (See also Arcs).
in air-blast circuit-breaker 7312
in air, speed of movement with magnetic field 681
arcing short-circuits, automatic control 3346
current and length variations 109
current when switching one of two parallel circuits 2731
dynamic behavious in low oil-content circuit-breakers 4024
energy measurement in arc 6099
free a.c., extinction processes 5418
freely recovering arcs, reignition volt. charact. 4359
high-current, mech. deformation of contacts 6623
low-current switching, physical theory 3339
movement of arc on round rods, Cu, Fe and Al 3697
open, extinction conditions 5419
tests on open-type switchgear cells 4730 [3343
transient restriking voltage, four-parameter definition
Circuit diagrams (See also Equivalent circuits).
No entries this year
Circuit theory (See also Fundamental concepts).
a.c. networks, topological synthesis 4941
active networks, transformations 7665 [6171
active RC networks, synthesis of driving-point impedances
analogy of transistor with high-mu triode 5684
approximation of networks 7662
basic dynamic, in machine design 7153
calculations, difficulties in different systems of units 3921
circuit—field problems, iterated Laplace transformations 620
circuit matrix of linear connected graph, realizability 6142
circuit physics (book) 6139
complex circuits, equiv. quadripoles using conformal transformation 2895
constrained networks, matrix analysis 6732 [5609
continued fraction theory and zeros of a polynomial 2251,
cross-field theory for 1-ph. induction motors 2681
differential equations, solved by differential analyser 8519
diode detector, variable parameter device 7897
dissipative networks, modified Dirac system 4944
dual input describing function technique 3472, 5537
elect. machines, new form of tensor equations 3288, 5969
ferroresonance, theory 3928
ferroresonant, step function analysis, pulse circuits 7664
field shaping by induced current, boundary conditions 7071
flow graph, optimum formula for gain 4932
flow-graph solutions of linear algebraic equations 6140
Fourier approximation for limited bandwidth 243
fundamental and harmonic distortion, f.m. wave 3636
Gaussian principle of least constraint 7622
generalized telegraphist's equation for waveguide 276

Circuit theory - contd
inductive discharge across var. resistor 3925
irredundant Boolean branch-network, realizability 1498
Kron method of tearing, dual method of indentification 7637
large systems, new approach to Kron's diakoptics 6733
linear graph theory 6718
synthesis of switching functions 6734 [7630
linear passive reciprocal time-invariant I.R.E. standards
linear signal flow graphs, I.R.E. standard definitions 7631
linear systems, solution of problems in phase plane 2252
conditions for monotonic response 2255
topology and solutions 1499
M.K.S. system, development of formulae 5295
machines, space vector and symmetrical components 7148
multidimensional space filters, basic concepts 3512
node system of equations 7660
n-port synthesis with negative resistors 7661
parametric oscillations in damped circuit 4967
path matrix and switching functions 1561
pulse circuits, mathematical derivation 7746
quadripoles, rectangle representation 244
topological treatment 4931
RL circuit with half-wave rectification 7070
real polynomial, invest. of charact. of zeros 252, 3517
realizability theory of n-ports, algebraic structure 2903
resistive network and arc generator generalized theory
Routh's algorithm, applications 6147 [622
saturating devices, approximation to harmonic response
scattering matrix synthesis 7633 [1046, 3806
series circuits with variable parameters, power factor analysis 2763
signal flow graphs, review 1481
static circuit characteristic, linearization 7068
symmetrical matrix, analysis of parametric amplifiers and convertors 7892
system synthesis using digital computer 1090
tensor form of Maxwell's equations 1131, 7067
three-phase currents 6007
topological networks, R.A.A.G. memoirs, vol. II 3918
topology and characteristics, network-analysis matrix method 7657
transformation of circuits, universal method 624
transfer functions, numerical calc. 5269 [6143
transients, representation by series of orthogonal functions
transistorized negative impedance convertors, analysis 2462
trees and co-trees in topological network structure 4942
trigger circuit, optimal state parameters 7725
voltage and current transformation matrices 791, 5607
voltage across flat disk carrying radial current 3930
volt-ampere, complex representation 7075
vector quantity representation 7074
Circuits (See also Equivalent circuits; Printed circuits; Pulse circuits; Transistor circuits).
coupled (See also Directional couplers; Tuning). [5602
for balancing of unbalanced a.f. signals without phase-shift
frequency jumps and pulling effects 296
i.f. transformers for 70 Mc/s amplifiers 4934
iron-cored, nonlinear oscillations 2193
ladder networks in oscillator circuits 1496
propagating structures, periodic coupling 3257
transformer coupling for parametric amplifiers 2983
oscillatory (See also Filters; Oscillators; Resonators; Transmission-line theory, high-frequency; Tuning).
charge and disch. of nonlinear capacitor through linear inductance 7617
crystal oscillator for diel. constant meas. 6187
cyclotron resonance r.f. detector tube 5093
four-frequency nonlinear reactance circuits, analysis 6795
linear, time dependent parameters, parametric excitation
pulse discharges in capacitors, theory 6120 [3537
resonance prevention in earthed voltage transformers 135
rheolinear oscillators, with variable parameters 7877
single-resonance parametric amplifiers 6247
Civil engineering (See also Dams; Railways).
airfield runways, profile variation meas. 6659
applications of computers 590
bridges, elec. heating of road surface 6134
dam structures at Caribou Falls, Canada 1156
geothermal power station construction 2651
nuclear power station practice 7138
penstock design and construction 4620
pumped-storage plant, dams and structures 6564
Civil engineering - contd
reclamation projects, integration with hydro power 6549
thrust-boring system for cable ducts 6616
tunnel construction, hydro-electric power station 17
underground cable ducts, tamping and pavement breaking [674
Coaxial cables (See Cables, communication, coaxial).
Coils (See also Cores; Inductance; Windings).
